

Bag Lifting Heads

- Versatile Vacuum Lifting Pads for Virtually All Industrial Bag and Sack Lifting Applications.
- Designed for Robotic End Effectors, Tube lift system and pick and place machines.
- All but model BH90-P are unmarked making them perfect for OEM use.
- High quality rubber seals are long lasting and will lift even crumpled bags with ease.

ANVER Bag Head Vacuum Pad Attachments are ideal for use with vacuum tube lifter systems in the food, chemical and pharmaceutical industries, or anywhere bags are used. The three standard sizes available will handle all the standard bag sizes found in industry today. They are widely used in industry.

Stainless Steel Bag Heads: These highly polished vacuum attachment pads feature a stainless steel top cover, stainless or plastic mesh screen, and hand-replaceable foam sealing rings. These are rugged, heavy duty pads for continuous industrial use. A four mounting hole pattern allows the pad to interface with various standard ANVER adapters, swivels, etc., and other machine mounts.

Plastic Bag Heads: ANVER also builds a line of rugged, Plastic Bag Lifting Heads in two sizes which handle most commonly used bags. They are durable, lightweight, dent-resistant and a very economical alternative, well-suited for the majority of applications. They work well, are lightweight and have quickly become our top sellers in this market segment.

ANVER Item No.	A Length in. (mm)	B Width in. (mm)	C Height in. (mm)	D Mounting Bolt Circle in. (mm)	Seal Style	Optional Skirt No.	Replacement Seal No.
BH40-P-E5C1	11.00 (280)	7.25 (184)	4.05 (103)	3.15 (80)	Rectangular	BH40-SK	BH40-FR-E5C1

BH40-SSP-B9	11.00 (280)	7.25 (184)	3.94 (100)	3.15 (80)	Rectangular	BH40-SK	BH40-FR-B9
BH40-SSP-G3G6	11.00 (280)	7.25 (184)	3.94 (100)	3.15 (80)	Tapered	BH40-SK	BH40-FR-G3G6
BH52-SS-G3 Discontinued See BH40-SSP-E5C1 for Replacement	11.42 (290)	7.40 (188)	2.95 (75)	4.72 (120)	Tapered	BH52-SK	BH52-FR-G3

Note: Please consult with factory for adapters, extensions, etc. Most feature two inch diameter connectors to accommodate the high airflow required for bag lifting and handling. Special foam seals are available with Extra Soft Edges, for handling printing signature bundles.

Rubber Skirts: Rubber skirts are available for all sizes although they tend to get sucked in under the pads and are best avoided if possible. They are usually not necessary if matched up with an ANVER High Airflow vacuum station.
