

Ergonomic Vacuum Tube Lifters

Tube Lifter Accessories

Quick Disconnects for Lift Tube Heads

ANVER Quick Disconnect systems can also be installed above the lifting head. This convenient option allows the same lifting tube to be used with a variety of head assemblies. These adapters are most practical when different load shapes and sizes necessitate multiple control handle lengths. The quick release system allows the operator to swap out complete control heads quickly and easily, as opposed to changing the handle.

Features:

- Stainless steel ferrule with nickel plated adapters for use in washdown environments.
- Saves set up time for multiple lift head applications.
- Available for all tube sizes. Consult Factory.

Tube Adapter Part Number	Tube Size	Can Adapter Part Number
VT-QRHT-100	VT100	VT-QRHB-M
VT-QRHT-120	VT120	VT-QRHB-M
VT-QRHT-140	VT140	VT-QRHB-M
VT-QRHT-160	VT160	VT-QRHB-S
