

Suction Hand Cups

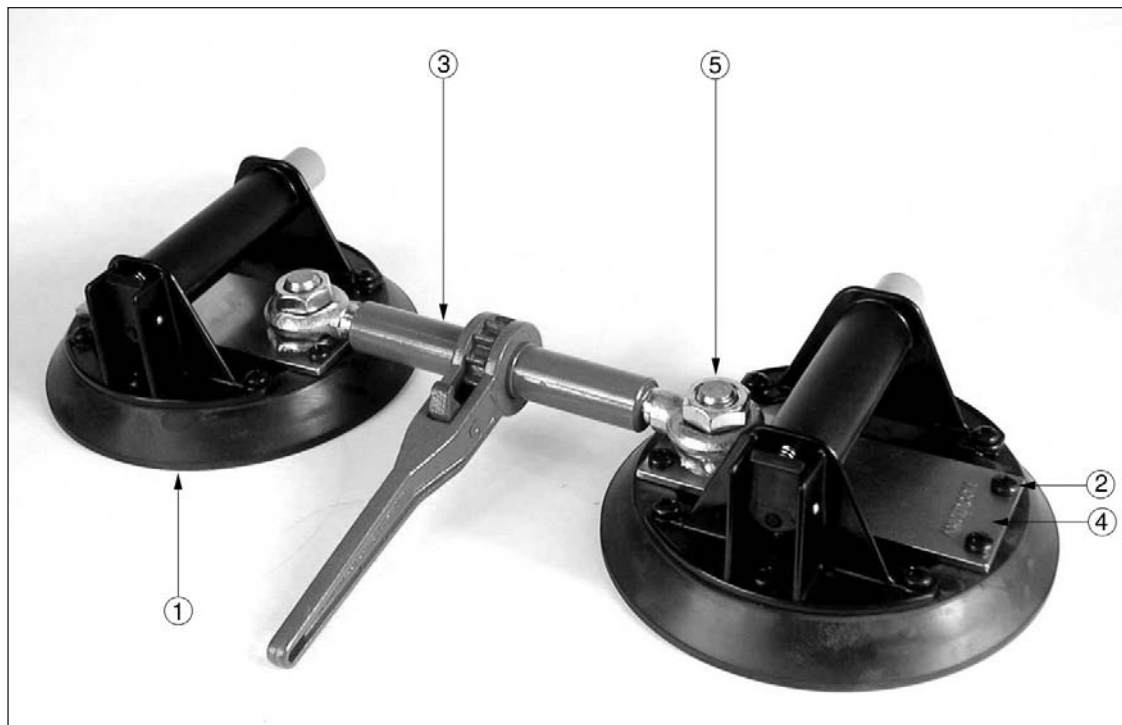

Dual Handcups w/ Tightening Bracket

The Perfect Countertop/Floor Tile Assembly Solution

- Designed to pull two flat surfaces or seams together.
- Perfect for DuPont Corian® and Formica countertops, marble and granite, flooring, mirrors, glass, plastic, or any situation in which flat, non-porous surfaces need to be pulled together.
- Adjust the easy-to-use Ratchet and it provides fully adjustable tension to pull workpieces together during setup. Great for stone tiles (as shown).
- While one set is handy, large counters usually need two pairs, one on each corner, for an even pull.
- The ratchet can be removed in order to use the cups alone as manual lift aids.
- Ships in three separate boxes
- Hand Cups can be used individually by easily removing the connecting ratchet assembly.
- Easily changes in seconds.

ANVER Item No.	Carrying Capacity at a 4 to 1 Safety Factor	Description
