

A Complete Range of Pump-Action Style Hand Vacuum Cups - overview

- The Plastic Style Plastic HC-S108, S109, S110 are perfect for everyday shop use. All three models are top sellers offering excellent value. Note: These are new generation models which have thicker plastic handles which resist cracking, flexing or denting. These cups have proven so reliable and leak free in temperature extremes they have replaced our metal handled S-pump versions which are no longer offered.
- The Metal 601 Series cups are designed for years of professional use. They are more expensive, but are top quality German made handtools and worth the price.
- The new Battery 601 Powered Series are the latest and safest handcup available on the market today. This handcup is ideal when you are handling difficult loads and need the absolute best, most secure handcups made.
